

"The Last Warning"

ISLAND COLONY FOR DOUKHOBORS IS NOW PROPOSED

Victoria. — Fanatical Doukhobors from all over Western Canada, including those who have been making trouble in interior British Columbia, will be placed in a prison colony, probably on Darcy Island, in the Gulf of Georgia, between the mainland of British Columbia and Vancouver Island, if the Federal Government accepts plans laid before it by the Provincial Government.

The scheme, it was revealed, has been placed before Hon. J. H. King, Federal Minister of Health. He will discuss the matter with his colleagues on his return to Ottawa.

The proposal that Doukhobors who refuse to obey Canadian laws be removed to a colony by themselves, where they will have no contact with law-abiding members of their sect, is advanced by the Provincial Government in the belief that the whole Doukhobor problem is a Federal issue. The Doukhobors, it is explained, were brought here under contract by the Federal Government.

As Doukhobor colonies exist in Alberta and Saskatchewan, as well as in British Columbia, no single Provincial Government could be pointed out, can adequately deal with them.

Darcy Island is suggested as a suitable place for the proposed colony, because it is isolated and escape from it is almost impossible.

The Provincial authorities feel that the fanatical members of the Russian sect should not be placed permanently in a penitentiary. Some stringent form of imprisonment, it is thought, is desirable. Darcy Island or some similar place, where they would be allowed comparative liberty, would be able to engage in agriculture. After being in the time it is hoped they would agree to embrace Canadian customs.

Find Lost Aviator

Rescued in Northern Manitoba After Wandering in Bush for 10 Days.

The Pax, Man. — After wandering 16 days in the wilds of northern Manitoba, during which time an intense search by air and land was made for him, C. P. Mewa, young engineer, was discovered by a patrol of the Canadian Mounted Police. Mewa had been virtually abandoned hope of finding him.

Mewa is little the worse for his experience. He is somewhat thin and haggard, having lived principally on berries, which are plentiful in the north this season, and he expressed confidence that he could have made his way to Oxford House, had not the patrol picked him up. He was in tatters as a result of scrambling through the thick brush.

The youthful flier, who is a pilot for the Northern Alberta Mineral Exploration Company, was lost on August 24, when forced to land near Kene Lake owing to engine trouble. He remained with his machine for two days, hoping that his companions would be able to spot him from the air and come to his assistance.

When aid did not arrive, Mewa decided to set out for Oxford House, 70 miles as the crow flies from the place where he landed. The bush, however, is very thick throughout the territory and the country is dotted with lakes, making travel by foot extremely hard. It is estimated that he walked over a hundred miles in attempting to reach his goal.

Mewa's plans were sent out to hunt for him and Indian trackers took up his trail, being guided by occasional foot-prints and scattered berry bushes. When Mewa was found the Indians were only 12 miles behind him, and probably would have found him in two days' time if he had not been seen from the air.

Heads Grain Exchange

Winnipeg. — William J. Murphy, vice-president of the Bellanca Grain Company, Limited, was elected president of the Winnipeg Grain Exchange, succeeding James A. Crowe, who retired. Mr. Murphy was elected by acclamation. A. P. White, of the firm of Clark and Martin, and Ernest S. Parker, were elected vice-presidents.

Alerts Wheat Pool

Calgary, Alberta. — The Alberta Wheat Pool now owns 450 elevators spread over the length and breadth of the province. This is an increase of 155 over the number operated last year. The Pool now has facilities to handle approximately 90 per cent. of all wheat.

W. N. 1898

Makes Important Discovery

Young Scientists Startles American Chemical Society With

Demonstration. Minneapolis. — The splitting of a hydrogen gas, in two substances, was demonstrated to the American Chemical Society.

It was called the "greatest scientific discovery of 1929," by Dr. Hugh S. Taylor, of Princeton University, chairman of the session.

Dr. R. F. Butcher, a young German, who was a 17-year-old freshman in the front-line trenches at the close of the world war, is the discoverer.

Dramatically he set his proof before the eyes of the chemists in a spot of light upon the wall of a University of Minnesota lecture room.

Like a moving figure it wrote the forecast of a revolution in physical chemistry. This revolution was described enthusiastically by Dr. Taylor.

"It opens the way to finding an entirely new species of molecule. It is the first proof of something forecast mathematically by the new wave mechanics. It means that our texts on physical chemistry will have to be rewritten."

The discovery has no present commercial use, but the new world in chemistry it seems to open is very important.

Forecast Dominion Election

Hon. Robt. Forke Says Elections May Be Held Within a Year

Winnipeg. — Within 15 months — and probably within a year — a Dominion election will be held, was the forecast of Hon. Robert Forke, Minister of Immigration, speaking before the Winnipeg Liberal Association here.

The Dominion minister declared that the Liberal party would make gains in the Maritime. Manitoba, he said, would be the keystone province of the Liberal Government.

"Why pay people to come to this country," he asked, "Canada is a good enough country for people to come to of their own volition."

The matter of assisted passages required very serious consideration, the minister commenting that he intended to cut out some of the assisted immigration after the election.

No immigrant who paid his own passage had been reported. The minister said that all immigrants coming out must be self-sufficient. He said that the British Empire has come out under the assisted passage plan. "I still believe that there is room for every man in Canada, but we want them to come here only when we can absorb them," he declared.

Jury Makes Recommendation

Unable To Establish Origin Of Fatal Winnipeg Fire

Winnipeg. — Stating that it was unable to definitely establish the origin of the fire that destroyed the May Court on September 1, with the loss of nine lives and more or less serious injuries to 10 persons, a coroner's jury which has investigated the disaster has recommended that the building was not adequately equipped with means of escape.

The jury recommends that proper authorities forthwith have a thorough investigation made of all buildings of three stories or more used as residences by three experts, including the fire chief, to secure their unbiased opinions and make recommendations for more adequate protection when necessary of occupants in case of fire.

Yukon Parcel Post

Service To Be Suspended During Winter Months

Calgary. — Parcel post to the Yukon will be suspended during the season of closed navigation on the Yukon River, which extends approximately from October 1 to May 21.

During this period mail addressed to the Yukon will not be accepted unless directed to Champagne, Carcross and White Horse.

Permission to convey such mail as is offered by the public for carriage via air service from Prince George, B.C., to the Ingonia River area in Northern British Columbia, has been granted to the Western Canada Airways of Winnipeg.

Special stickers will be sold by the company in payment of the special charge for air carriage.

Steamship Disaster

Helsingborg, Finland. — The number of persons missing in the Kuru steamship disaster on the Kuru River is 145. Only 45 bodies have been recovered.

Doukhobors Sent To Jail

Fifty-Nine Members Of Sons Of Freedom Are Sentenced

Regina. — Ninety-six Doukhobors, men, women and children, self-styled Sons of Freedom, have been sent to Prince Albert. Of this number, 59 have been sentenced to serve six months in jail, while the remainder, consisting of 37 juveniles, 20 boys and 17 girls, will be handed over to the children's welfare bureau at Prince Albert.

Thirty-four women who, disrobed two miles east of Mikado on the highway, pleaded guilty of charges of indecent exposure. Two women and 23 men were convicted on a vagrancy charge, while no charge was laid against the juveniles.

Soviets To Stay Out

Will Not Participate In Plans For An Economic United Europe

London, Eng. — An Echo-Telegram dispatch from Riga states that the Russian foreign commissariat had declared the Soviet Union did not intend to participate in plans formulated at Geneva for an "economic union of Europe."

The dispatch said the Soviet opposed schemes "tending to estrange Europe from America" and desires to remain neutral in the forthcoming economic struggle between the two continents.

STATE CONTROL SUGGESTED FOR BROADCASTING

Ottawa. — Radio-broadcasting in Canada should be controlled and operated by a government-owned company. That is the effect of the chief recommendation of the royal commission which presented its report to Hon. P. J. Cardin, minister of national and industrial affairs.

The company would have some what similar relations to the Dominion Government as the Canadian National Railways has, but would be distinct from that organization. It would have 12 members, three representing more particularly the Dominion Government, and one representing each of the provincial governments.

The members of the commission were Sir John Aird, Toronto, chairman; Charles A. Bowman, Ottawa, and Dr. Augustin Proulx, Montreal.

The recommendations provide that the task of supplying the program will fall upon the provincial representatives of the company.

The present over-broadcasting stations would be reasonably recompensed when their plants were taken over or dismantled. The expenditure necessary for the operation and maintenance of the service should be met by license fees, rental of time and costs for program material, including direct advertising and a subsidy from the Dominion Government.

High-power stations should be erected across Canada. As a nucleus to the publicly-owned service, 50,000-watt stations should be provided to give a good reception over the entire settled portions of the Dominion.

In making public the report, Mr. Cardin said he was well satisfied with the commissioners and their work.

The report will be submitted first to the technical officers of the department. Later it will go before the cabinet. To put the recommendations into effect would necessitate important legislation.

Represent 100 Years of Service

379

Harry Saunders (left), engineer of the special Canadian Pacific Railway train that recently took E. W. Beatty, president of the railway, and several directors on a tour of the Maritime Provinces, and Charles Henderson, conductor on the train, represent them just over a hundred years service with the company.

Mr. Henderson has been in service with the company for 53 years of service, making him the dean of C.P.R. engineers; Mr. Saunders has a record of 43 years' railway service.

IN AIRPLANE CRASH

Lady Mary Heath, noted English aviatrix, was seriously injured in an airplane crash at Cleveland. Her condition is reported as favorable.

Saskatchewan By-Elections

Dates Have Been Set For October 7 and 14

Regina, Sask. — Fixing of the dates of eight by-elections made necessary by the elevation of certain private members of the Saskatchewan Legislature to cabinet positions, calling for the first regular session of the legislature by the new government shortly after the first of next year, the Saskatchewan convention next spring, are the three developments of the political situation in Saskatchewan.

Premier J. T. M. Anderson, announcing during the day the dates of the by-elections, stated the regular session of the legislature would not likely be called until after the first of next year. George Spence, in charge of the organization department of the Saskatchewan Liberal Association, made the announcement of the intention to hold a provincial convention in the late winter or early spring.

The dates of the by-elections are as follows: Regina, Moose Jaw, Saskatoon and Lumsden, nominations on September 30, elections on October 1. Tisdale, Moomin and Yorkton, nominations on October 7, elections on October 14.

Dress Reform Movement

Combination Trousers and Skirt Suggested For Universal Use

London, Eng. — The dress reform movement broke into the congress of the World League for sex reform on a scientific basis when a combination of trousers and skirt was suggested for universal use.

Dr. J. C. Lagel, of England, addressing the delegates 11 British ladies, said that men possibly will adopt skirts or women trousers in the future, or more likely there will be a uniform combination for both sexes. He urged creation of a new mode of dress which would incorporate the advantages for both.

Macdonald May Sail On 28th

New York. — In a special cable from London to The Daily Express it was stated that Premier Ramsay MacDonald has definitely decided to sail for the United States on September 28.

Study Wheat Prices

Washington. — Investigation of the disparity between Canadian wheat prices and the prices of wheat in the Northwestern States, together with a study of the whole subject of grain storage facilities, has been initiated by the Federal Farm Board.

Send Message To His Majesty

Business Men Meeting In Edmonton Send a Message Of Greeting

Edmonton. — A message of greeting from the 300 business men from all provinces and representative of five of the leading chambers of commerce of Great Britain, together with members of the Mother of Parliaments, was sent to King George VI at the opening of the fourth annual convention of the Canadian Chamber of Commerce. The message, signed by the president, William B. Brown, conveyed to His Majesty the rejoicing of the convention over the improvement in his health.

Messages of greeting from the Governor-General; Rt. Hon. Ramsay MacDonald, prime minister of Great Britain; Rt. Hon. W. L. Mackenzie King, prime minister of Canada; Lord Passfield, secretary of state for the dominions; Lord Iveagh, president of the Federation of Chambers of Commerce of the British Empire, and from the premiers of various Canadian provinces, were read.

"It is the very earnest and confident hope of myself and of all my colleagues in the chamber of commerce of Canada may continue at a rapid rate; and that the free, happy and the mutually advantageous association which unites her with Great Britain may be strengthened," said the prime minister of Great Britain in his message.

International Balloon Race

Ten Entries For The Gordon Bennett Event To Be Held Soon

St. Louis, Mo. — Ten balloons representing the United States, France, Germany, Belgium, Denmark and the Argentine, will start away from St. Louis, September 25, in quest of the international Gordon Bennett trophy. It will be the eighth of the international balloon races and the third to start from St. Louis. Seven of the races have been won by the United States, and five by Belgium, which gained permanent possession of the original Gordon Bennett trophy with its third straight victory in 1924.

The United States became permanent possessor of the second trophy by Belgium in 1926, 27 and 28. Now the third of the Gordon Bennett trophies is up, with three U.S. airmen seeking to gain the first leg on it.

LABOR PARTY WINS APPROVAL OF THE PEOPLE

London, Eng. — With Communist endorsement completely severed, the Labor party conference opened in Brighton, at the end of the month, is expected to decide the bulk of the program for the general reforms with the object of bringing the party constitution into line with modern necessities.

The executive's report proclaimed that the Labor Government has seized the people's imagination. It is a good deal of a relief, it is said, or spirit that is refreshing, it says, after the inertia of the past four years.

Answering the Liberal demand for electoral reform, the report says the Labor party was struggling for constancy.

The affiliated membership of the party dropped from 3,294,000, in 1927, to 2,600,000 last year, largely due, the report says, to difficulties arising from the Trade Union Act which compelled civil service organizations to discontinue affiliation, while in many instances new machinery for securing the contracting in of party supporters had not yet been established.

Premier's Western Trip

Depends Largely On The Plans of Ramsay MacDonald

Ottawa, Ont. — The western trip of Premier Mackenzie King this fall depends a good deal on the plans of Premier Ramsay MacDonald, of Great Britain. Premier King states that if Premier MacDonald visited Washington, he (Mr. MacDonald) would come to Ottawa at the conclusion of that visit. If the British prime minister came to Ottawa, Mr. King said he wanted to be here to receive him and discuss certain national matters to Canada and Great Britain. He expects that if Mr. MacDonald crosses the ocean it will be about the end of this month, or early next month. Mr. King will not go to Washington. He regards Mr. MacDonald's discussions there as entirely the business of the president and the premier of Great Britain.

Want Disarmament Conference

Geneva. — The League of Nations was called upon by the Irish Free State to convene a general disarmament conference of the powers. Patrick McGilligan, foreign minister of the Free State Government, made the proposal. He expressed regret that 11 years after the close of the world war so little had been done to remove the weapons of war.

Funerals Behind Bars

Vancouver, B.C. — Chastising the word Russian songs of their religion, 104 men and women with seven children, members of the Sons of Freedom sect of the Doukhobors, were quietly detained at Esquimalt, near New Westminster, and taken in buses to Okalla jail, where they will serve sentences of six months for indecent exposure imposed at Nelson, B.C. The Doukhobors were arrested at South Sloon, on August 29, after staging a nude parade.

Anglo-American Naval Accord Expected Soon

London, Eng. — Official announcement that Premier Ramsey MacDonald would sail on September 28, to the United States, to visit President Hoover, was hailed here as definite evidence that the two governments had virtually reached an agreement upon naval disarmament.

Well-informed circles indicated that a question involving three cruisers of the eight-class full scale is the only point upon which full accord has not been reached.

The developments came swiftly after a conference between Mr. MacDonald and Charles G. Dawes, United States Ambassador. Just previous to this conference, announcement had been made that the United States' answer to the latest British proposals had been received in London. It was assumed that General Dawes carried this answer to No. 10, Downing Street, when he called on the Premier.

The official date for Mr. MacDonald's sailing was announced immediately after the Ambassador had departed. It was pointed out that the United States' answer to the latest British proposals had been received in London. It was assumed that General Dawes carried this answer to No. 10, Downing Street, when he called on the Premier.

Foreign Capital In Canada

United States Credit With Largest Share Of Investment

The Wall Street Journal's correspondent says: Regarding the possibility of financial readjustments through Canada in the event of Washington's tariff survey being such as to provoke reprisals, it is pointed out that the United States has invested in Canada \$1,742,043,000—United States sources are credited with \$1,550,000,000 and British capitalists with the balance.

Domestic capital, however, owns and controls 90 per cent. of all investments in the Dominion, and Canadians have invested in the United States approximately \$275,000,000. United States capital is invested chiefly in pulp and paper industries, railway securities and large timber interests. In the manufacture of pulp and paper, it is no secret that United States money and experts dominate the Canadian situation.

Western Canada, in addition, requires more capital. It is suggested that there are investments of a very profitable type in British Columbia alone for another \$100,000,000. This cannot come from domestic sources. British investors do not seem in a hurry to invest their capital coming in from the United States for this purpose. The time is approaching when capital will have to be secured from other sources. It is a matter of banking record that very few investments by large American concerns on this side of the line have failed to prove profitable. This has not been the case so generally with British capital. The explanation is that invariably the American investors send their own men along to administer their projects. The British do this at "long range" and that has not proven so good.

Thus, no matter what the tariff may bring, feeling in Western Canada is that money knows no international restrictions. It is not felt in Western Canada that this will make any difference with the international investments. The pulp and paper investments from the other side located in Western Canada have proven enormously profitable and from them, products are being shipped to all parts of the world. But chiefly to the United States market.

Better Town Building

Alberta Towns Recently Sought By Fire Will Follow New Town-Planning Method

Better towns than have been built from the fire at Wainwright and Yorkton. If new planning schemes now proposed carry out, and Lloydminster will doubtless follow suit. In both the first-named towns, action is now being taken for rebuilding on approved and systematized plans, in which the government town planning commission is assisting.

H. L. Seymour, provincial commissioner of town planning, has visited both the first-named towns and the municipal officials, and suggested ways and means of improving and beautifying the towns in the course of their rebuilding.

A local town planning commission has been appointed in Wainwright, and a model building by-law, prepared as a standard for use throughout the province, has been adopted.

The average distance of Venus from the sun is 67,000,000 miles. The planet receives no more than forty-eight degrees of heat from the sun's rays.

Two young things were sent to jail the other day for taking \$7 out of a newspaper man's pockets. That's the sort of thing that put Houdini on the stage.

Good punctuations—vacation periods.

Had Interesting Career

Englishman Who Landed In Japan In The Year 1600, Is Japanese

National News

The life of an Englishman who has been part of Japanese history for over 300 years, though he is almost unknown in his own country, is to be published this autumn.

In 1620, the tercentenary of the death of William Adams, the Japanese Government erected in Tokyo a statue to this national hero, who died as Lord High Admiral of Japan.

Now his life is being prepared by Sam Lewis, a Fleet Street journalist, and it makes an amazing story.

Adams was Drake's stockbroker in charge of supplies when the Armada was destroyed. Being a man of a religious turn of mind, he objected to the practical ways of the captain, and went into sea-going business on his own account.

He set sail for the Far East as master pilot of five ships. He landed on the shores of Japan in 1600, with one ship, in which there were left only five starving men who were able to stand.

When the survivors in their ship, *Christy*, came ashore, it was by good luck that they were not killed. For in those days every Protestant sailor who set foot in Japan was put to death.

Adams and his companions were brought before the great Tokugawa Shogun, who took a fancy to the Canadian captain, and he was permitted to build a ship for the Imperial Navy.

Using Old Postage Stamps
Very Serious Offense To Make Use Of Cancelled Stamps

There are still scattered all over the world a few people who think that it is smart to cheat the Government of their country out of the price of a postage stamp. There are a few such in Canada, and once in a while, the Canadian postal authorities find that a letter has been mailed bearing a stamp that has on a previous occasion done its full duty.

Even an attempt to send a letter package without having the proper bearing a used postage stamp is a very serious offence, and the Postal authorities warn the public that in every case the person responsible for trying to use a postage stamp a second time will be dealt with as a criminal.

It is not a matter of trifling importance, and the law imposes a fine of from ten to fifty dollars in each case. So it does not pay to try to save a couple of cents by this mean act of dishonesty. And, further, the letter or package is not returned to sender but is held for instructions from the Postmaster General.

Work
Growing More Tobacco

Canada Produced Over 4,500,000 Pounds During Past Three Years

"With more than 4,500,000 pounds of tobacco grown in Canada during the past three years, it is time for us to think of our foreign markets," said Dr. N. T. Nelson, chief of the tobacco division of the Department of Agriculture, in an address at Ottawa, Canada was rapidly becoming a factor in supplying the world tobacco and every effort was being made to put her to the front as a tobacco growing country.

Of the smoking tobacco sold in Canada, about two thirds is home grown, while in the cigars sold in Canada, about 40 per cent. of the tobacco used is Canadian.

Insect Control In Canada

Forests Of Yellow Pine In British Columbia Saved By Control

Work
The economy of insect control was well illustrated in the case of bark beetles in yellow pine. These insects threatened the forests of yellow pine in British Columbia with complete destruction about six years ago. The Dominion and Provincial Departments of Agriculture co-operated in control work and destroyed more than 50,000 beetle-infested trees.

The cost of these operations amounted to \$100,000, and the yellow pine stands which were saved from total destruction are worth \$5,000,000.

Modern Scenery

The bear went up the mountain. To see what he could see:

But—
187 signboards,
17 auto camps,
56 filling stations,
76 orange juice stands,
11 garages, and
11,987 unbroken summer tourists.

Was all that he could see.

Field Crops In The

Peace River District

National News

Good Yields Harvested In Spite Of Drought Conditions

An Illustration Station is operated under the direction of the Department of Agriculture, at Ottawa, in the far north point of Fort St. John, in the Peace River District. According to the report of the chief supervisor of Illustration Stations, very good yields were harvested in spite of a period of drought, and a menace of grasshoppers. In spring wheat, Reward and Garnet yielded identically 30 bushels to the acre, with corn maturing one day ahead of Reward, each giving excellent samples of grain. Turkey Red fall wheat yielded 26½ bushels to the acre, fall rye 38 bushels, oats of the Banner variety 20½ bushels, and of Legacy 22 bushels. Peas of the Chancellor variety gave 20½ bushels to the acre, while potatoes—Irish Cobbler—gave 307 bushels. Tests were made with different grasses and clovers, 2,080 for bromes and sweet clover, 2,250 for alfalfa and alfalfa, 2,000 for alfalfa, and 2,350 for sweet clover. Commenting on these crops in his report for last year published by the Department of Agriculture, at Ottawa, the superintendent states that both Western rye and bromes seem adapted to local conditions and have given comparatively good yields in dry seasons.

He set sail for the Far East as master pilot of five ships. He landed on the shores of Japan in 1600, with one ship, in which there were left only five starving men who were able to stand.

When the survivors in their ship, *Christy*, came ashore, it was by good luck that they were not killed. For in those days every Protestant sailor who set foot in Japan was put to death.

Adams and his companions were brought before the great Tokugawa Shogun, who took a fancy to the Canadian captain, and he was permitted to build a ship for the Imperial Navy.

Crime In Russia

Taking Of Human Life Is Greater Than In Western Europe

National News

Murder and suicide are both on the decrease in Soviet Russia, but the taking of human life is still greater than in Western Europe, and probably even greater than in America.

There are few statistics to go by, but the newspapers carry daily accounts of murders, in city and country, and often on a rather large scale. The number of village correspondents alone who have been killed in the last year or so runs into scores. They make it their business to report upon bribery, official malfeasance and other unpleasant conditions, and often they pay for their courage with their lives. Imprisonment for a few years is the usual punishment reserved for what the Reds consider more serious offences—counter-revolutionary activities, bribery, espionage and the like.

Dr. L. L. Letovitch, chief medical expert of the commissariat of public health, is authority for the statement that murders and suicides have become fewer, but accidents and injuries resulting from violence are increasing, he said. Half a million people, according to the figures, apply to doctors each year, in Russia, after being beaten or injured in accidents. The majority of them, he said, were "more or less intoxicated."

"This figure can easily be doubled to get at the true number of injured, inasmuch as fully half the people who are hurt do not go to doctors," explained the health officer.

In rural districts, injuries are mostly due to beatings, family quarrels, and fights between peasants and village rows, but in the larger cities 90 per cent. of the injuries are attributable to the dwelling crisis, which has caused so much overcrowding of many families into apartments meant for one family.

Through all these statistics passes the red thread of alcoholism, which has been proven in Russia to be the inseparable companion of crime.

Why Women Live Longer

"Women breathe much more frequently than men in the course of a minute," says Dr. Maurice Kraus, explaining why women live longer than men. For statistics show women centenarians are in the majority. "By this more active breathing they burn up more of the waste products in the body," he explains.

Asked to write an essay on Quakers, a little girl wrote: "Quakers are very meek people, who never fight and never answer back. My father is a Quaker, but my mother is not."

The seasons on Mars are twice as long as those on earth.

Dude Ranching at Kananaskis

Certain people become cowboys through environment, and the young people of Canada are attracted to this. They are going in for that vacation as a happy, healthy, summer recreation. In the Alberta foothills, and in increasing numbers each year, they ride the mountain trails, and they learn to rope and tie calves; sleep out overnight, wear chaps and headbands, and in time they become thoroughly acquainted with the

mysteries of the diamond hitch, and the art of milking wild cows—real wild ones.

The most internationally famous of these Dude Ranches is that located at Kananaskis, on the Bow River, near Banff, Alberta, and is operated by Mrs. W. A. Brewster.

It is known to the whole countryside to hundreds of people in cities from coast to coast as "Mrs. Bill's." She runs the ranch and is a guide, instructor, friend and confident to a defect innumerable. They come

from from New York, and Chicago, Montreal and Toronto, San Francisco and Los Angeles, and from points between. They arrive a bit weary from a winter in the cities and they go away happy and healthy and with appetites—real appetites, the kind you pay for.

1. A few of the dudes and some cowboys in front of the home ranch.

2. Mrs. Bill Brewster on her favorite trail.

3. Lighing up after lunch.

4. Packing for the mountain trip.

To Cultivate Soya Bean

Farmers In Great Britain Will Grow Vegetable With Many Uses

National News

Scores of British farmers will next spring be sowing a bean that is literally worth its weight in gold. It is the wonder bean of the world, with more uses to its credit than any other legume or cereal.

For human food it provides fresh, condensed, or dried milk, flour for bread or biscuits, margarine, cheese, a coffee substitute, infants' food, custard powder, salad oil, the basis of numerous sauces, while commercially it is used for soaps, paints, enamels, varnishes, printing inks, celluloid, rubber substitutes and glycerine for high explosives.

It has behind it a history of 5,000 years, but for reasons of climate has never in the past been successfully cultivated in England.

For more than fifteen years now, J. L. North, curator of the Royal Botanic Gardens, has experimented with seventy different varieties of Soya bean, seeking one that would be sown in May and harvested in September, and would thus be suitable for the British Isles.

At last his experiments have been crowned with success, and he declares that it will be henceforth definitely possible for farmers to secure supplies of seed.

Plan Sugar Factory

Lethbridge District

Beet Growers Want One Erected In

A sugar factory for the Lethbridge Northern Irrigation project is the objective of settlers on the project. Working to that end it is planned to seed 5,000 acres of beets next season. Backing up this "more beets" drive, "Profitable Farming," published by the L. N. colonization department, is devoted practically all of its space to sugar beet publicity. A beet excuser to the Lethbridge Northern growing areas, was made in August, under the auspices of factory officials when many of the fine growing fields of beets on the project were inspected.

Turkey Bans Arabic Alphabet

No determined is the Turkish government to put over its pet reform of replacing the Arabic alphabet with the Latin, that it has ordered the postal and telegraphic departments to cancel letters or telegrams from Kerpiti, Ankara, and other points that come addressed in the ancient characters.

An irate landlord wrote to one of his tenants asking whether he would "quit or pay." The tenant replied: "Dear sir, I remain yours faithfully."

The total strength of the London police, including all ranks is 19,780.

Eradication Of Couch Grass

Some Practical Methods For Getting Rid Of The Troublesome Pest

It has been found by an experiment conducted by the Field Husbandry Division of the Experimental Station, that couch grass plants will be greatly weakened if the plant is kept clipped back to the surface of the ground for a period of two months.

Another experiment with couch grass was carried out to ascertain the effect of cultivation so carried out, as to cut up the plants into small pieces. The root stalks were separated into pieces of inch and half-inch lengths, and the soil containing a node or joint was placed in the soil under conditions suitable to growth. The fifty-eight per cent. of the inch pieces and fifty-two per cent. of the half-inch pieces produced healthy shoots.

Still another experiment by which the live couch grass root stalks were brought entirely to the surface, was carried out. It was shown that dry and hot weather conditions ten days exposure was sufficient to dry out the root stalks to such an extent they were incapable of further growth.

The report of E. S. Hopkins, the Dominion Field Husbandman, for the year 1902, contains a number of recommendations of other experiments with couch grass and recommends a practical plan for the eradication. This consists in ploughing the soil about five inches deep and immediately after the hay crop is removed and keeping it worked through with cultivation at frequent intervals until the autumn, when deep ploughing should be done. This report, published by the Department of Agriculture, Ottawa, covers a wide range of experiments.

who had been a comedian up until this moment and now suddenly unleashed a voice vibrating with sentimental appeal.

At related when he reached the chorus. It was the chorus that would put him over or reveal him as a failure to Mollie, but he felt it so deeply that he seemed to sing it with great effort. Every group in the audience was blocked out from his vision except Mollie—her vivacious face stood out alone in a sea of darkness. Yet he could not help but see that she was still talking to Marcus. She, among all the listeners in the room, seemed to be heedless of his presence.

But as she whispered to Marcus a strange thing happened. The astute revue producer heard the song and although he hadn't paid attention to it at first, now he suddenly became all interest. His hand came up in a quick gesture, demanding silence from her. He whispered curtly:

"Sh-h! I want to hear this."

It was the first time that evening he had flattered the floor show by the least bit of attention, so Mollie was astounded. She followed him, gasped at him, and she, too, began to listen. At first she averted a glance of amusement at Mollie's face—what did the producer mean by trying to flatter her? Then, after a moment, Mollie realized that Al was putting some new quality into the song. It was as if he had discarded the ordinary technique of ballad singing, and was creating his own method, the supremely natural method as it went along. At times his voice dropped to a low, pleading croon; again he talked the words with all the fire at his command; and now his voice suddenly rose to a startling and passionate crescendo of song. Mollie was not stupid; she realized that the singing water she had scorned so recently was really creating a living song. Like the call of a falcon, his resonant voice repeated the title—"Always"—which occurred so frequently in the ballad.

At first she was a little doubtful, but as the song went on, she was leaning forward, giving Al his rapit attention.

As Al felt Mollie's eyes on him the song seemed to grow, to take on all intents and purposes, he was alone with her, adoring her, telling her of his heart, his love, his life. He was going home—it seemed to him her gentle.

But the person most deeply affected by the song was the girl, the student, quietly leaning against the wall at the back of the room, and in tears came to her eyes and trickle, unheeded, down her pretty cheeks. The heart was a constant stammering as he sang that song, in that way, to her! Everything she possessed, her life!

For the first time she realized with what passionate devotion she loved him. Her lovely young brown eyes and face lit up, and she was smiling, yet forced to stand aside unnoticed and see another woman, who did not appreciate Al Stone, receive the homage that he tossed so eloquently at her feet. It was madness to Grace but—there was nothing to be done about it except to go on loving him and endure the pain in her heart.

Now she saw Blackie Joe approaching. She hurriedly tried to dry her tears. Blackie saw and understood her feeling at first glance but, like the good, understanding fellow he was, pretended not to notice. "Poor kid," he thought. "Well . . . that's the way it goes." Then he turned to Grace and whispered confidentially:

"Our com's not so bad after all, is it?"

She looked up and forced herself to smile happily. "He's wonderful!"

Finally the last notes of the music died away—the song was ended. Al stood for a moment as if in a trance, then quickly turned and walked toward the dressing room. The room was as silent as a desert at night, not a crackle of applause broke the stillness. Al's chin came down on his chest; he felt he had failed and he wanted to get out of the room as quickly as possible.

At the Marcus table Mollie's eyes were fixed on his retreating figure. She was obviously affected, a faint air that she didn't understand had come to her heart. At any rate, she knew what Al meant now.

The reaction of Marcus to the song was decidedly different. He saw it as a piece of work, a medium for his thrilling audiences. Turning to Mollie he almost shouted: "That's a song! One of the best ballads I've heard!"

In a flash Mollie realized that Al had a real hit, a heart-throb number that might put him over on Broadway and make him famous. Her eyes became intensely brilliant; she was thinking fast.

As Al approached the dressing room doorway he encountered Grace and Blackie. Swiftly he spoke:

"You see, it's no use—I knew I couldn't put over a ballad. For a moment it seemed I had Mollie interested, but I couldn't hold her, and not a peep from the crowd—"

But Al stopped, dazed. From the crowd came the slow rise of applause. They had been too closely held by the song to give vent to their emotions as he walked rapidly away, now their feelings were released in a storm of appreciation. He had reached every one of them and their strenuous hand-clapping rode toward him like a great wave. They had never given him such a reception before.

As he swung about, facing them, his dejected look passed, and a smile crossed his features. Then he saw Mollie's face turned toward him, and he knew that he had won.

"That water's a singing fool!" he great! And who wrote that song? I want it for my revue."

Not for a moment did Mollie doubt that Al's future was assured, with the great Marcus determined to have his song. She began to lay her plans swiftly.

"The water wrote it," she answered. "The boy who just sang."

"The water wrote it?" repeated Marcus. "I've been told cooily."

"Yes, but the idea," Mollie said. "Go! (He continued.)"

Banting Research Foundation

Western Doctors, Having Received Awards, Will Work On Interesting Problems

In recognition of their contribution to the progress of science two Winnipeg doctors have been made the recipients of awards under the new Banting Research Foundation, according to announcement made by board members.

Under the grants Dr. B. Chowin will carry out important experiments in connection with his studies into the causes of kidney diseases in young children, while Dr. J. Jackson will engage in research study of the thyroid gland.

A study of gas anaesthesia will be conducted with the grants by Dr. W. E. Brown, Jr., demonstrator in anaesthesia at the University of Toronto, and Dr. Allan Kennedy, who graduated from Varisty two years ago and has since been at the Toronto General Hospital.

Dr. W. D. M. Lloyd, who holds an M.S.C. degree from Western University, is also a recipient of a grant. He will work at Toronto on a study of the changes produced by certain diseases in the heart muscle and in its function.

An endeavor to locate the brain cells concerned in controlling blood pressure will be made by Paul Bernatoff of Saskatoon. Dr. F. P. Munro will study the solubility of uric acid, and Miss E. G. Frame will work on the comparative anatomy of the spleen.

The interesting problem of the changes in the brain in old age will be studied by C. G. Smith, in London, Ont.

The foundation is supported by public spirited citizens of the Dominion as a mark of honor to Dr. F. G. Banting, the discoverer of insulin. Grants are made to foster and assist absolutely harmless research.

Making Flying Safer
Weather Reports Received By Pilots Give Location of Storms

The following paragraph, lifted from the story of a reporter who recently travelled from Los Angeles to New York by the air-lift book-up of Transcontinental Air Transport and Santa Fe and Canadian Pacific railroads, tells us how everything can be made safe for passengers.

"Weather reports," writes the reporter, "are the big work in the business. We look out, anyway, but two pilots return with ground stations ahead and behind us by radio and knew just where all the storms were. So we simply flew around them."

The Albuquerque weather report told of three storms converging to the eastward, so we took a detour south, but we were around them quickly in the midst of lightning and rain, and reached Clovis, N.M., before dark, which the pilot had not expected to do."

In a few words that paragraph tells how flying has passed the hazy stage and has made safety certain.

Figures Show Women Are Careful Drivers
Record Of Columbia Traffic Bureau Prove Bulk Of Offenders Are Men

The old fashioned cartoonists who still share the general masculine belief in the inability of women to drive automobiles was given a severe test by the Columbia Traffic Bureau. The bureau has been conducting an intensive campaign to cut down traffic accidents. Of 509 persons arrested for various violations of the traffic rules since July 1, only twenty-eight were women.

That's less than 5.2 per cent. of the total and indicates, according to ardent feminist calculators, that women are about thirty times as good as men when it comes to driving automobiles. The standpatters for the old doctrine, on the other hand, argue that it merely goes to show, that most traffic policemen are of an excessively susceptible nature.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to those who suffer from it. Asthma is a disease that has been cured by the use of the most modern means. Dr. J. D. Kellig's Asthma Remedy, a combination of body and mind, returns with its use and nights of sound sleep come back to you. Try it today. It can supply you.

When ever a man comes to the conclusion that he is indispensable, says a wag, then he isn't.

The name for the state of California comes from a Spanish word meaning "not furnace."

Adopting Western Ideas

Chinese Youth Have Good Times But Still Respect Parents

Although they may not say "Whoopee" in China, the modern Chinese youth makes it, they call it "Whoopee." The younger generation in South China, are reaching for and adopting Western ideas."

Said G. P. Hansworth, general agent of the Canadian National at Hong Kong, who passed through Winnipeg on his way to Hong Kong after spending a holiday in Europe and England.

"At the better entertainment places," continued Mr. Hansworth, "you see the modern Chinese flapper with short skirts, bobbed hair and silk stockings, while the boys wear double-breasted suits and wide pants. They dance for frolic to our music, and have adopted English foods and eat it the way we eat it. The young people are also very fond of movies and Hong Kong and Shanghai have excellent theatres."

In spite of this change to Western ideas, it is very noticeable that the respect and admiration which the Chinese youth holds for his parents and older people is not disappearing.

SAVE THE CHILDREN

In Summer When Childhood Allergies Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel they are saving their children from reasonably safe during the hot weather. Stomach troubles, cholera, typhoid and diarrhoea, carry off thousands of little ones every summer.

It is most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Boy Scout Shoots Kodiak Bears

Will Write a Book Covering Trip to Alaska

Dick Douglas, famous famous Boy Scout, who crossed Canada recently for a hunting trip, has just returned to the short space of a month, about two hundred Kodiak bears in the island of Alaska. "Incredible as it may seem I shot two hundred bears while on my trip," he said. "One hundred and ninety-eight with a camera, and two with a gun. One only measured six feet, and I was told he was a small one, but he looked big enough to me when I saw him first about 50 yards away." Douglas, who accompanied Martin Johnson during his last African trip, will write a book covering his trip across Canada, to the Kodiak Islands. En route to Montreal, Douglas stopped at the National Park to photograph some animals and scenery to reproduce in his new volume.

Tracing Sea Currents
British Meteorological Office Securing Data By Drift of Bottles

After having floated 2,500 miles in 44 days, a bottle recently picked up at North Queensland. It had been dropped overboard on October 7, 1927, by a British vessel while in a most desolate part of the Pacific Ocean, 1,000 miles north of the Fiji Islands. It was a message asking that it be returned to the meteorological office of the British ministry, which is having 40 ships sailing the seven seas drop similar bottles every day in a plan of securing data to be used in tracking sea currents.

If a man doesn't know when he is well off he at least realizes when he was.

ASPIRIN

Aspirin is a Trademark Registered in Canada

IT'S folly to suffer long from neuritis, rheumatism, or headaches when relief is swift and sure, thanks to Aspirin. For 38 years the medical profession has recommended it. It does not affect the heart. It takes it for colds, rheumatism, sciatica, lumbago, Gargle it for a sore throat or tonsillitis. Proven defenses for its many uses, every grocery store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

The Singing Fool
By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS
Marcus, the famous Broadway producer, takes a party of four to Jackie Joe's New York City. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Mollie, the ballad singer, and begs her to read a song he has written for her. After scornfully refusing and telling him she will never marry a waiter she goes to the Marcus table and tries to ingratiate herself with the great producer. Blackie, seeing Al dejected, urges him to sing the song himself — to Mollie. Al may be can't sing a love ballad, but finally he consents. Grace, the cigarette girl, who is deeply and unselfishly in love with Al, encourages him.

CHAPTER VI
The room was filled with chatter as Al took his place beside the pianist, at the edge of the dance floor, to sing the heart song he had written to Mollie. No one in the gay crowd seemed to notice him; no one except himself. Blackie, who knew Grace and knew that the next few moments meant to him success or failure with the girl he loved. He was plainly nervous at trying a ballad, his face went white and one hand gripped the side of the piano.

The pianist struck the opening bars and Al began the verse, haltingly but determinedly. He had located the one face he wanted to keep before his eyes throughout the song—Mollie. But Mollie was busy talking to Marcus; she didn't even know Al was singing.

As he continued the people at the tables nearest him stopped talking and gave him their attention. Then it seemed as if he caught the merry-makers a little farther away and they, too, became silent. He was singing as he had never sung before, throwing his whole soul into the words.

When he finished the verse and swung into the chorus the pianist whispered up at him, "Good boy, Al!" And as the pianist his fingers swiftly up and down the ivory he marvelled at this singing waiter.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B., writes: "My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, he vomited so, that I was fearful for his life. I tried many medicines, but he was always getting worse. A friend told me of and after the second dose I saw an improvement. He was completely cured. I have used it for all my children, and my husband. It gives great relief and when he goes away from home to work he always takes a little with him."

A Sale for Sharp Eyes and Quick Minds

The hour has been set—The date you know—and when the doors open, the entire community—the town as well as all the surrounding district will awake to the most determined and drastic selling event in Its History.

Sell yourself a Chevrolet

CHEVROLET owners sell themselves on Chevrolet. They learn behind the wheel of the New Chevrolet, just what it means to drive a real six . . . a six with a high-compression valve-in-head engine, with staunch and stylish Body by Fisher . . . yet a Six at the price of a four.

They taste the joys of six-cylinder power and smoothness . . . six-cylinder snap and acceleration. They experience Chevrolet's marvelous comfort and handling ease. They discover that this amazing new Chevrolet gives them every modern convenience feature . . . such as twin-beam, foot-controlled headlights; finely upholstered, deep luxurious cushions; high-speed window regulators; Tenside quality hardware; completely equipped, indirectly lighted instrument panel, including electric temperature indicator and theft-proof Electrolock.

When you are considering the purchase of a car sell yourself on the car you want. Get behind the wheel of the New Chevrolet and make your own tests. Then decide on Chevrolet only after you have proved to yourself that it offers you more for your money than any other car in the low-priced field.

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar, and by virtue of the Power of Sale provided by the Land Titles Act, under a certain mortgage which will be produced at the time of the sale, there will be offered for sale by public auction at the Post Office in the Village of Oyen, in the Province of Alberta, on Saturday, the 3rd day of October, A.D. 1920, at the hour of 2 o'clock in the afternoon, the following property, namely:

The North half of Section 21, Township 29, Range 1, West of the 4th Meridian, in the said Province, containing by admeasurement 320 acres, more or less, reserving thereout all mines and minerals.

Terms of Sale to be 10 per cent cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances save taxes for the current year.

The vendor is informed that the above property is situated about 12 miles from Oyen, and one and one-half miles from a School.

The land consists of 320 acres, 125 acres of which are under cultivation, and 125 acres additional could be cultivated. There is about 80 acres fenced with two wires. There is one well on the land.

For further particulars and conditions of sale, apply to Messrs. Newell, Lindsay, Emery and Ford, Barristers, Edmonton-Alberta, Vendors' solicitors.

Dated at Edmonton, in the Province of Alberta, this 25th day of June, A.D. 1920.

Approved: W. Forbes,
Registrar

About Town and Country

The C.W.L. will serve afternoon tea and hold a sale of home cooking at the Case shop room on Saturday, September 21.

Miss Thelma Dial, who has been spending a two-week holiday visiting her father Mr. B. H. Dial, left last Sunday by motor for Gull Lake, Sask.

Mrs. Percy Hall, Jean and Roy and Mrs. John Innes, Lisle and Dorothy returned home last Wednesday after spending two months visiting friends in Toronto and Campbellford, Ont.

Mrs. J. C. Desso, who has been visiting her daughter Mrs. H. Hancock, in Edmonton, returned to Oyen last Saturday.

Mr. Julius Nordblom has purchased the farm of Mr. Robert Lewison.

Miss E. J. Acheson of Ottawa, who arrived in Oyen last week, is visiting Mr. and Mrs. J. R. Acheson.

A bean supper and sale of home cooking will be held in the United Church on Saturday, September 25, under the auspices of the Sunday school (proceeds for Christmas tree fund).

Sunday, September 20, is Rally Sunday. Parents are specially asked to be present.

Mr. and Mrs. H. C. Woods were Craigmyle visitors Monday and Tuesday of this week, afterwards going to Calgary. They expect to return to Oyen to-morrow.

Ralph Shacker, Howard Wade and Maynard Davis left last Saturday night by motor en route to the Peace River country.

Excellent progress is being made at the new United Church. Concrete for the basement walls is now being poured and the contractors expect to have this part of the work completed on Friday.

Mrs. C. S. Wright, Miss Catherine Wright, Miss Cleopha Desmond, Mr. and Mrs. R. J. Scott and Mr. and Mrs. G. A. Gosselin were judges at the Cereal School Fair last Saturday.

Mr. Carl Stull left Tuesday morning for Carstairs.

Mr. and Mrs. R. J. Scott, Miss Cleopha Desmond and Mrs. C. S. Wright were Sedalia visitors on Monday last, when they judged work at the Sedalia School fair.

Mr. Arthur Anderson of Stanmore arrived in Oyen Sunday, and is now in charge of Oyen Theatre.

Mr. Frank Todd of Pollockville was a town visitor last Sunday.

Miss Jean Mitchell, who has been visiting her sister Mrs. C. J. Gillespie, for the past two weeks, returned last Saturday to Saskatoon.

Mr. Emile Tessier, Mrs. W. Walker and daughter Rita, Mrs. Briley and daughter Mildred, returned to Oyen last Sunday after spending a few days in Calgary.

Mr. and Mrs. F. W. Grant, arrived in Oyen this morning and will spend the winter months here.

Fire at Fuego Successfully Combated

On Saturday afternoon fire broke out in the alley between the engine room and the derrick at the Fuego well. Mr. Garrett the driller on duty, was engaged in bailing operations when he first noticed the blaze. Shutting down the machinery, with a full barrel hanging in the well and other members of the crew and staff succeeded in putting the fire out, but during the time they were fighting it, gas pressure increased in the well and forced the bailer up a considerable distance. On the pressure subsiding the bailer dropped, broke the cable and fell in the mud.

Mr. MacArthur, and W. D. Morrell left on Sunday at noon, in the latter's truck, for Okotoks to procure another bailer and returned with one at midnight on Monday. The crew at once recommenced bailing operations, and at nine o'clock on Tuesday night the lost bailer was fished out of the hole.

At noon today the hole is reported to be clean and drilling operations are being continued.

Here and There

(289)

"The greatest apple crop in the history of Nova Scotia," is the almost unanimous opinion expressed by prominent fruit growers and Government experts of the province. It is estimated the crop will reach 2,500,000 barrels, at least a million barrels more than any other crop ever raised in Nova Scotia.

In preparation for the opening of the 1920 game hunting season in New Brunswick, 25,000 hunting licenses have been sent out from the Department of Lands and Mines to 250 vendors in all parts of the province.

"I am watching with the greatest interest the progress being achieved in the United States where railroads are experimenting in the use of aeroplanes as adjuncts to their services," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, interviewed at Toronto recently. "There they are using planes by day in certain places and rail travel by night and the experiments are very interesting to me," the president added.
